Innovations in Sustainable Habitats

The GRIHA Approach

10 & 11 December 2012
Vivanta by TAJ - M G Road
Bangalore

Event Focus
The Energy and Resources Institute (TERI) along with ADaRSH (Association for Development and Research of Sustainable Habitats) is organizing the 3rd Regional Conference and Exhibition, “Innovations in Sustainable Habitats – The GRIHA Approach” in Bangalore on 10th and 11th December, 2012 at Vivanta by Taj, MG Road. The conference is being planned to engage actively with building industry stakeholders to take forward sustainable Habitats in South India the GRIHA way. The 3rd Regional conference is being organized with global vision and local focus. Professionals from different disciplines including architecture, engineering, construction companies, educational institutes, financing institutes will be participating in the conference. This year’s conference has a special focus on communities and their involvement in attaining sustainability through green lifestyle. The conference is planned for two days, on the first day the theme of the conference is Research and Innovations in green design and green lifestyle. The second day is focusing on on-ground realities in implementation of sustainable habitats and innovations in building energy systems.

Objectives
- **Highlight** Research and Innovations to achieve sustainable habitats through architecture, selection of materials, façade, structural systems, landscape design and innovations in water and waste management
- **Disseminate research** being carried out in various universities / institutes to mainstream sustainable habitats
- **Awareness** generation on tools/mechanism that are available to predict and monitor real time performance of sustainable habitats.
- **Mainstream sustainability** through Green lifestyle where eminent professionals will share their lifestyles and approach to achieve sustainability through everyday living experience
- **Demonstrate** sustainable large developments & showcase of on-ground realities in implementation of sustainable habitats by GRIHA building owners through GRIHA rating
- **Focus** on Innovations and implementation of innovative building energy systems which shall include lighting, HVAC, controls and integration of renewable energy both On site and Off site.

Who Should Attend?
- Architects
- Manufacturers and suppliers
- Multinational companies
- GRIHA Evaluators and Trainers
- GRIHA Project Teams
- State Nodal Agencies
- Renewable Energy Agencies
- Public Works Departments
- Financial Institutions
- Associate Members
- Academia
- Indian Institute of Architects
- Consultants
- International Agencies
- Public Sector Units

Post Event: Advance Course on Sustainable Lighting Practices is being jointly organised by TERI & Philips (Separate registration & fees charged)

Registration for Conference
*Invitation are open to building industry professionals across disciplines & students*

For Registration, contact **Ms. S Jyothi**, Email: sjyothi@teri.res.in, Tel: 080-25356590
For online registration and payments, please visit the website [www.grihaindia.org](http://www.grihaindia.org)

Registration Fees:
- Conference fees before 15th Nov 2012: ₹3500/-
- Conference fees after 15th Nov 2012: ₹4500/-
- Advance course on Sustainable Lighting Practices: ₹11000/-
- Conference + Advance course on Sustainable Lighting Practices: ₹13500/-

Student discount on special request
