MESSAGE

ADaRSH, TERI and the Ministry of New and Renewable Energy (MNRE) are organizing the 4th National Conference on Green Design on 14 February, 2013.

GRIHA serves as an integrated platform to meet sustainable habitat objectives set forth by the Government of India, including the National Mission on Sustainable Habitat (NMSH) and ensures implementation of the same in a synergised manner.

At my Ministry, both the Central Public Works Department (CPWD) and the National Buildings Construction Corporation Ltd. (NBCC) have decided that all their buildings would be minimum 3 Star GRIHA rated and they are registering their projects for certification to ADaRSH, the independent society created by TERI with support from MNRE for promotion and implementation of GRIHA.

My best wishes for the conference and its success.

(Kamal Nath)
