Choice**

**GREEN
JOBS**

1. *What is Sustainable Habitat Focus?*
2. *Who are Stakeholders?*
3. *What Can Qualify to be there?*
4. *Who are more wanted?*
5. *What career titles one can look for?*
6. *What is career progression?*
7. *Entrepreneurial opportunities?*
8. *What is required at Institutional/policy perspectives?*

National mission on sustainable habitat

The national mission on sustainable habitat approved by Prime minister. It is one of the eight missions under national climate change action plan and aims to make cities sustainable through improvements in energy efficiency in buildings, management of solid waste & shift to public transport.

The National Mission for Sustainable Habitat which is a component of the National Action Plan for Climate Change will broadly cover the following aspects: Extension of the energy conservation building code - which addresses the design of new and large commercial buildings to optimize their energy demand; Better urban planning and modal shift to public transport - make long term transport plans to facilitate the growth of medium and small cities in such a way that ensures efficient and convenient public transport; Recycling of material and urban waste management - a special areas of focus will be development of technology for producing power form waste. The National Mission will include a major R&D programme, focusing on bio-chemical conversion, waste water use, sewage utilization and recycling options wherever possible.

PM approves mission on sustainable habitat
