

Mr. Anish Chopra has attained a degree of Bachelors in Technology (B.Tech.) from Kurukshetra University. After a short stint in a management role in the service industry, he underwent a 3-year intensive training & experience in construction of Steel Buildings. He eventually continued his education in management & infrastructure from Indian School of Business (ISB-Hyderabad), including an in-depth learning in Public-Private-Partnerships i.e. the PPP Model of Projects in India. He has undergone courses of Green Building Ratings from Indian Green Building Council (IGBC) & keeps upgrading his knowledge consistently through workshops, seminars, conferences & courses. Mr. Chopra is a Serial Entrepreneur, with an interest in developing Start-ups into sustainable organizations. His current company, "Greenifyi Technologies", is his second entrepreneurial venture, through which he is taking forward his passion to contribute to the environment by promoting eco-friendly technologies in various aspects of human habitats. A Yoga & Meditation enthusiast, he is also a passionate social worker, contributed in helping people come out from a state of internal conflicts & suffering through his one-day Workshops, as well as he has been a part of many social work initiatives supporting the Indian Government's initiative of Swatchh Bharat Abhiyan & climate change. He values human beings & believes in the importance of the inter-dependent relationship between all human beings, creatures & nature.
