

Akash Hingorani

Architect Akash Hingorani has a special interest in water systems in the urban context, be it Riverfronts, Lake fronts, Storm water networks.

He has been engaged in creating sustainable public realm designs for different cities to help them revitalize their connections with their natural heritage.

His project showcasing, cleaning up river systems, managing storm water, creating new urban open space networks, demonstrate how placemaking can transform our cities into sustainable smart cities.

He has recently successfully led the WAPCOS – OASIS Design team to get city Guwahati shortlisted as one of the first 20 cities selected in the Government of India “Smart City Challenge”.
