Corey Enck, LEED AP  
Vice President, LEED Technical Development

Corey is USGBC’s Vice President of LEED Technical Development. In this role, he collaborates with volunteer technical committees and industry stakeholders to evolve and refine USGBC’s LEED green building rating system. For the last few years, he’s been focused on the development and launch of LEED v4. Previous to his technical development work, Corey managed USGBC’s certification team, where he was responsible for working with project teams and reviewers to ensure successful LEED reviews.

Prior to joining USGBC, Corey worked at an engineering firm providing services in building system design and energy management. He holds a mechanical engineering degree from the University of Pennsylvania and is a LEED Accredited Professional.
