Pradeep Barpande started his venture into greenery back in 1986 when he was still a student in college. This led to an extended period of entrepreneurship that has lasted almost 30 years. As a result, Pradeep now has expertise in Nursery, Soft-scape, Large Tree Transplantation, Soil Reclamation, Soil Stabilisation, Light Weight Gardening, Green Roofs, Vertical Gardens, Sensor based Automation of Irrigation with Remote Monitoring, High-rise Greenery, Urban Farming and now Vertical Farming.

Pradeep and Anuradha Barpande are the directors of Ecogreen Landscape Technologies India Pvt. Ltd, which specialises in the field of research, experiment, development, manufacturing, growing, installing and maintaining of non conventional greeneries. Currently, they are working in India, Malaysia, Bahrain and export their products to few more countries.
