**Griha 2017 (18<sup>th</sup>-19<sup>th</sup> January)**

## SUSTAINABLE MANUFACTURING PROCESSES

Parryware's eco-friendly and pollution-free state of the art manufacturing plants use the most sustainable and zero waste processes like waste water treatment and rain water harvesting. This further enhances our environmental and social concern by helping us treat water in a conscious and responsible way.

# Sustainability Initiatives @ Factories

Recovery of heavy metals (Ni & Cr)

Reuse of 70 % water in process after treatment

STP water for gardening

Fume extraction with Scrubber at Electroplating

Dust Collector at GP

Natural light & Use of CFLs

# Save up to 70%\*

## of water

Parryware's Green faucets are equipped with Green aerators which control the flow of water without affecting the volume and help save up to 70% water.

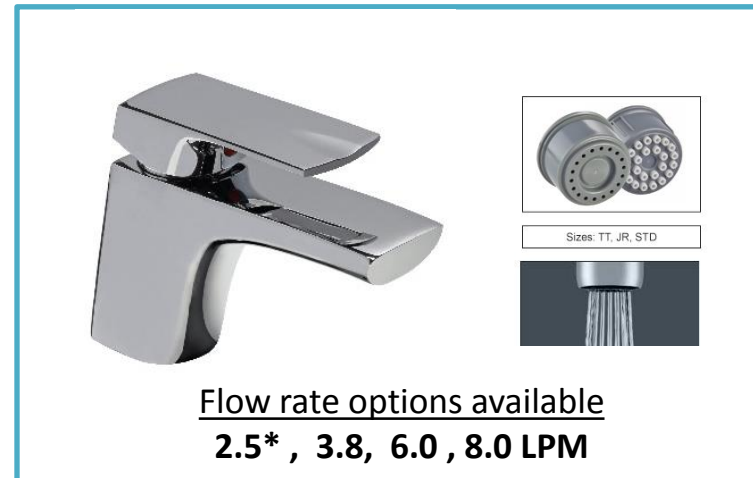

\*Under Internal Testing Standards done at 3.0 Bar Water Pressure - For Faucets

## Technology that saves water

### Flow Restrictors

This is a revolutionary technology that lets your taps and showers save up to 70% of water without compromising on the flow. Parryware Flow Restrictors adjust the flow in both low and high pressure conditions and offer the same voluminous flow every time.

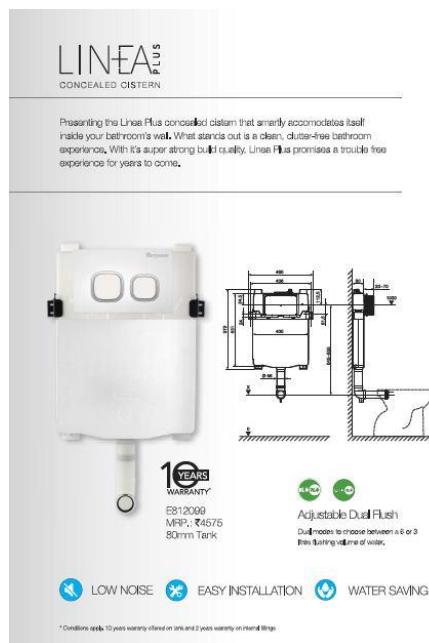

**\*Eco Friendly   \*Griha Certified   \*Customizable   \*Maintenance Free**

## Technology that saves water

### Dual Flushing

This is a revolutionary technology that lets your cistern save upto 60% of water without compromising on the hygiene. Parryware cistern with dual flush offer a choice of full flush 6L and half flush 3L in order to offer a smart choice of water usage to customers during the regular use.

**6L**

**3L**
