

DELHI'S EDIBLE ROOFTOPS: FINDING ROOTS IN CONCRETE SPACES

Kapil Mandawewala
CEO & Founder, Edible Routes

WHAT IS URBAN FARMING?

Utilizing rooftops, backyards/front yards, balconies, vacant plots, abandoned spaces, public spaces, public parks & institutions, empty spaces in schools, offices, commercial hubs & tech parks and other such confined spaces to grow food.

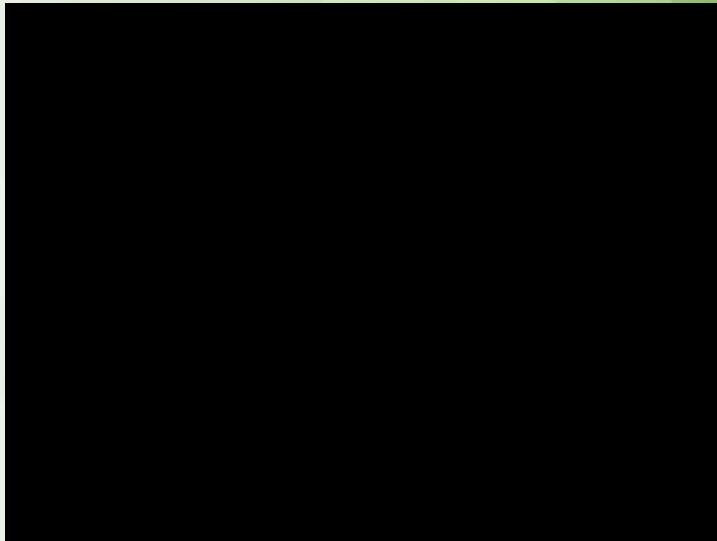

WHY URBAN FARMING?

- Connect with food – who, how and where
- Access to fresh, organic and seasonal food
- Converting garbage to compost
- Food security
- Turning cities green: cleaning the air
- Makes you happy

HOW TO START?

CONSTRUCTION MATERIALS: BAMBOO

CONSTRUCTION MATERIALS: ACP

CONSTRUCTION MATERIALS: BRICKS

FARM 8: COMMUNITY FARMING AND LEARNING CENTER

ABOUT EDIBLE ROUTES

Edible Routes creates spaces to grow food and strengthen community.

- Conduct workshops and provide support on urban farming and composting.
- Design and build urban food gardens.
- Set up and run organic farms in and around cities.
- Make and sell organic potting mixes, khaad, insecticides and other fun stuff to support kitchen gardeners.
