MAKE it SUSTAINABLE BUILDING MATERIALS – MiSBM

17th February 2016

Mili Majumdar
GRIHA Product Catalogue

Is an online product catalogue which has been developed to provide green building designers, architects, consultants, engineers and clients with all necessary information on green building products which can be used in order to make buildings GRIHA compliant.

Launched in 2012
Need?

• To ease the GRIHA process for clients: they will have an easy directory to look up and one component of documentation is removed.

• To consolidate data on building materials

• To reduce documentation for GRIHA rating system
Advantages

- Product enlisted by GRIHA Council for use in GRIHA and associated rating systems
- All information and technical parameters are cross-checked by GRIHA Council Technical Team to reduce information gaps.
Search by Criterion or Product Typology

GRIHA Product Catalogue is an online product catalogue which has been developed to provide green building designers and clients with all necessary information on green building products which can be used in order to make buildings GRIHA compliant. In recent times, the market of green building products has increased manifold. GRIHA Product Catalogue is an online product catalogue which has been developed to provide green building designers and clients with all necessary information on green building products which can be used in order to make buildings GRIHA compliant. Search by Typology
- Insulation
- Low-energy glass for interior applications
- Doors & window: panels and frames
- Panelling
- Low-energy bricks
- Fly-ash bricks/ AAC Blocks
- PPC
- External shading devices
- External Glazing
- Low-flow fixtures
- Sensor based fixtures
- Irrigation systems (drip, micro drip)
- Inbuilt Furniture
- Flooring
- False Ceiling
- Internal Partitions
- High SRI external paints/ tiles
- Innovation products
- Walling blocks

ABOUT GRIHA PRODUCT CATALOGUE

GRIHA Product Catalogue is an online product catalogue which has been developed to provide green building designers and clients with all necessary information on green building products which can be used in order to make buildings GRIHA compliant. In recent times, the market of green building products has increased manifold.

On the one hand, this has helped in increasing the availability of green building products but on the other hand, it the ever increasing range of products has made the building professionals unsure about whether a certain product meets the GRIHA parameters or not. In order to assist the building professional in selecting the products which help meet the GRIHA parameters, GRIHA Council in association with TERI is launching the GRIHA Product Catalogue.

**DISCLAIMER**

The products listed on the GRIHA Product Catalogue website, have been evaluated based on the technical parameters of GRIHA and SVA GRIHA criteria. This evaluation has been done based on the documentation — in the form of third party test results and declarations — submitted by the manufacturer to GRIHA Council. The listing of the product in the GRIHA Product Catalogue/Website is not a certification of the product as per any national or international compliance system. Although GRIHA has prepared the list with the greatest care, GRIHA does not guarantee that the information provided is accurate and/or exhaustive, and as such GRIHA cannot be held liable for any claims pertaining to the use of the information. Anybody relying or acting on the information provided herein may please ascertain quality norms for the listed products independently as required. The list is not complete and there may be other available products that meet GRIHA requirements. Project proponents are free to use other products, subject to alternative products meeting GRIHA requirements and submission of requisite supporting documentation to prove compliance.
