WINNER

State of the Art Office building and Campus for MEDA

Strategies implemented:

- Mixed use building integrated with solar panels in the building architecture itself.
- Use of multiple renewable energy measures such as: Conventional Solar photovoltaic panels, Bifacial Solar energy generation panels, Wind turbine and IPV (Building Integrated Photo Voltaic Panels).
- On-site renewable energy generation is 111% of energy consumption i.e. 3,14,700 kWh pa
