Planning Designing Const. IT Networking and Maintenance of Government Medical College at Korba CG on EPC mode

Bilaspur, Chhattisgarh

Planning Designing Const IT Networking and Maintenance of Government Medical College at Korba CG on EPC mode

Strategies implemented:

- 3 meter high barricading has been provided around the construction area.
- Existing mature trees were preserved on site.
- Gravel bed facility was provided at the vehicular entrance of the site.
- Spill prevention plan has been implemented to control effects of spill from hazardous materials like bitumen, diesel etc. on site.
- Soil erosion channels and sedimentations tanks has been constructed to prevent/reduce movement of soil outside the site.
- Topsoil has been preserved during construction to maintain its fertility and use for landscape post-construction
