

The Energy and Resources Institute

## Associate Membership

### Vision

- The GRIHA Council is committed to developing sustainable habitats across the country,
- Promoting green buildings across the country through the national rating system GRIHA, which adopts an integrated approach towards sustainability by addressing the development and environmental impacts like energy & water efficiency, waste management, health & well-being of the occupants as well as the construction works.
- Actual implementation of environmentally sustainable practices on construction sites with the help of routine due – diligence.
- Building capacity and creating awareness by reaching out to the various professionals associated with the green building industry through training and awareness programmes conducted across the country.

### Associate Membership

In addition to its various initiatives, The GRIHA Council consistently works in partnerships with a number of organisations under this programme that helps in the green development of the nation. This relationship with various stakeholders provides the support and knowledge required to implement sustainable practices in numerous communities.

### Benefits

- Registration fee waiver for a total of ten professionals to attend various GRIHA programmes.
- One speaking slot in one GRIHA programme (one day or three day)
- Two complimentary evaluations for GRIHA Product Catalogue
- Two sets of complimentary GRIHA Manual
- Promotion through the GRIHA website (brief write-up and links to websites of associate members shall be provided on the GRIHA website)
- Sharing of GRIHA logo for activities related to sustainable habitats

Additionally, The GRIHA Council can facilitate and conduct custom designed joint activities, keeping in mind the requirements of the member.

*The cost towards organizing specific event/training/awareness programmes shall be additional and discussed on a case to case basis.*

**Fees:** Available on request
